MORE THAN WATER

# FULVICA

MORE THAN WATER

**Fulvica Premium Black** is a dietary supplement that contains natural humic acids originating from organic matter found between peat and leonardite rock. These acids are the most common organic compounds occurring in nature, prevalent in all ecosystems: in soils, fresh and sea water, in the form of so-called dissolved organic carbon. Humic acids comprise humin and fulvic acids.

## UNIQUE PRODUCT FEATURES

Refreshing sugar-free taste. Vegetarian and vegan friendly. Product contains no yeast, wheat, gluten, soy, milk, egg and preservatives. Calorie-free.

### Why black?

Thanks to an innovative method of extracting humic acid, Fulvica Premium Black retains its natural ebony colour.

## + Alkalisating pH 8.1

Acidification of the body is not only common among bodybuilders, who typically consume very large amounts of protein on a daily basis, but also people who follow a diet that is low in alkalisating products and rich in acidifying foods such as meat, dairy, alcohol, wheat, trans fat and sugar. An alkalisating diet involves eating more alkaline-forming food products than acid-forming ones so as to support the functioning of the body.

## + Body purifying properties

Thanks to the innovative combination of humic, fulvic and humin acids, Fulvica Premium Black has an alkalisating effect on the body's pH. Also, humin acids detoxify the body, effectively neutralising free radicals that may cause many diseases and ailments.

## + Mineralising effect

Fulvica provides over +77 TRACE MINERALS – above all, it is a source of iron that is well absorbed by the body. It also supplies you with 70 electrolytes, which helps maintain chemical balance, healthy pH and electrical conductivity levels your body needs.

## PRODUCT QUALITY YOU CAN TRUST

**Fulvica™** - Premium Black has been approved by the National Institute of Public Health – National Institute of Hygiene (NIZP - PZH) and was awarded the Good Product Certificate at the 10th Food Market and Retail Forum in Warsaw in 2017.

**Refreshing sugar-free taste. Vegetarian and vegan friendly. Product contains no yeast, wheat, gluten, soy, milk, egg and preservatives. Calorie-free.**

Humic trace minerals are 100% natural, and importantly, they CANNOT be artificially produced in a laboratory. Trace minerals can only be found in high-quality foods and natural supplements. Among the many trace minerals the following can be found: selenium, vanadium, germanium and iodine.
